**MOUNTING**

Angle: 20° | Depth: 1.25in (31.75cm) | Width: +/- 1in (2.54cm)

For folding frame chair users that require angle, depth and width adjustment.
Anti-Slip Transfer Boards
Sliding boards are used to promote independence and safety during transfers.

For those with impaired balance and upper body strength, we highly recommend Stealth's ADI Anti-Slip Transfer Boards as a transfer-assist tool, often providing the needed assistance to enable therapist/caregiver performance of a safer and biomechanical friendly transfer.

Push & Transfer Gloves
Push & Transfer Gloves have an open finger, half thumb, wrap-around design for easy don and doff. Made of leather with padded palms and wrists, the gloves save wear and tear on users' hands throughout a long day of active chair use. Three inches of Velcro closure provide a secure fit as well as allows the gloves to fit most hand sizes.

ADI Disc Brake Systems
ADI Disc Brake Systems give users of all physical abilities near effortless controlled braking and the ability to fully lock the wheels. Experience the difference with the first fully integrated wheelchair braking system. Descend ramps and hills with confidence, lock your wheels with finger-tip effort and enjoy increased independence with ADI Disc Brake Systems.

Disc Brake Install Kit is also available which replaces the wheelchair camber tube with ADI's adjustable camber tube for easy installation.

ADI is a San Antonio, Texas based company founded and formerly owned/managed by Todd Hargroder, a quadriplegic of over 20 years.

ADI, who was recently acquired by Stealth Products, LLC., designs, manufactures, and distributes cutting edge products for the rehab mobility market. Stealth Products is a global leader in complex rehab technology and accessories, and shares a common goal with ADI that focuses on the future in order to progress with unique designs that target the end user.

The joining of these two companies will not only fuse a passion and the common goal to evolve in design, technology, and development, but to also inspire and enhance the future of the mobility market.
